Re : Business System Analyst – IAM Job ID16613

Dear Hiring Manager,

I am writing to express my keen interest in the Business System Analyst – IAM position advertised on your career portal. With a strong background in BI Analytics and a successful track record of collaboration with stakeholders, I am confident in my ability to contribute effectively to your esteemed organization. During my internship at Target Park, I played a pivotal role in implementing ETL processes and queries using Microsoft Azure, contributing to the development of efficient IAM solutions. I also developed a comprehensive data catalog within the Cloud Data Platform, ensuring seamless integration with Power BI and Cognos.

At Miscos Technology, as a BI Analyst, I collaborated closely with senior management and IT teams to define business requirements, automating existing Excel reports using Power BI to enhance operational efficiency while meeting IAM-related reporting needs. Moreover, my experience at Cavy IOT as a BI and Data Analyst involved transforming business requirements into functional specifications, utilizing IAM principles in ETL strategy design, and creating actionable dashboards in Tableau for multidimensional databases.

Thank you for considering my application. I am eager to discuss further how my skills and experiences align with your organization's needs. Please find my attached resume for your review

Sincerely,
Kirti Takrani
